

Sylpheed - Bug #41

Can not save sent mail while checking for new mail

02/08/2012 06:14 PM - Ozgur Altunyurt

Target version:	3.2	Spent time:	0.00 hour

Description

I'm using 3.2.0b5 on linux.

I have 7 mail accounts on different servers managed by sylpheed.

When it starts the "get all" process, the mailbox column is completely disabled for a minute or two, and if I send a mail at the same time, copy of the sent mail is not saved to sent box.

I get this alert informing that the mail was sent successfully but the sent mail could not be saved.

- Status changed from New to Resolved

As a temporal solution, sending of mail will be disabled while mail check is running.
